

ALL-OUT[®] System

NEXT GENERATION OF HOPPER BINS

Leadership Through Innovation[®]
for a New Feed Storage Standard

Exclusive features for ALL-OUT® bin performance

Brock reinvented the feed bin with the introduction of its next generation of hopper bins. Brock's Next Generation Feed Bin raises a new industry standard for excellence and value. Added together, the innovative features of the Next Generation Feed Bin comprise Brock's ALL-OUT® system to provide solutions for better productivity in your operation.

Product Features

- **SPRING-LOCK®** Lid provides a positive, spring-aided closing action, yet is easy to open with one hand.
- 40° Roof matches the natural incline angle of repose for stored feed to maximize usable feed storage capacity.
- **HYDROSHIELD®** Weather Guard directs moisture to drip off the bin's sidewall and keeps it off the bin's hopper and boot.
- **ACCESS PLUS®** Hopper Access Door permits easy clean out of the bin from the ground. The Door retrofits into previous BROCK® Feed Bin models too.
- Digital **WEIGH-MATIC®** Scale System uses temperature-compensated load cells to give highly accurate weights for feed stored in individual feed bins.
- Automatic boot slide actuator system automatically closes boot slide shut off on empty bin while opening second bin in tandem systems. Manual actuator is also available.

Optional Ladder Security Door

Product Advantages

- **SPRING-LOCK®** Lid resists wind and keeps out snow and rain. When open, the lid slides down and out of the way of feed truck's auger.
- **SPRING-LOCK®** Lid and **ACCESS PLUS®** Door aid in biosecurity by allowing remote bin opener location and by easing cleaning chores.
- **HYDROSHIELD®** Guard results in less water on bin hopper and boot.
- Automatic boot slide actuator on a tandem feed bin system helps keep birds or animals from missing a feeding.

Warranty and Service

For the distributor nearest you, call the Brock Customer Service Department at 574-658-4191 or go to www.brockgrain.com.
