

### *Offers High Grain Moving Capacity With Gentle Grain Handling Ability*

- Brock's Grain Cyclone offers the ability for high capacity grain handling with the use of 4-, 5-, and 6-inch (102-, 127-, and 152-mm) diameter air systems and an appropriate adapter.
- Provides gentler handling of grain than conventional "deadhead" collector units.
- Cyclone unit efficiently separates grain and air at the bin entry point with the grain dropping smoothly into the bin while the air is vented back into the atmosphere.
- Cyclone comes equipped with replaceable urethane liner to limit wear in the cyclone unit.
- Manufactured from heavy-gauge steel with powder-coated paint for long-life durability.
- Easy to install and service.
